Practical Information

ABOUT: MODEL EUROPEAN PARLIAMENT

The IMEP Project (International Model European Parliament) is a simulation of the European Parliament work sessions. During the meeting, participants will roleplay the Members of the European Parliament (MEPs) in order to debate different topics on the European agenda. Young MEPs will meet in parliamentary groups to find a solution to the issues proposed, through the drafting of a legislative act. To that end, they will make speeches, negotiate possible solutions, find political agreements between different groups. Above all, they will have to respect a democratic debate and the procedure rules of the European Parliament.

*The theme of this year's simulation will be the Circular Economy.
Students will have to prepare at least 1 week in advance for
participate to the simulation. Study material will be given to them at
registration.*
